PROJECT EXPERIENCE

Personal Portfolio | independent director

2023.02

- Project Outcome:** Designed and built a comprehensive, easily accessible portfolio website using HTML, CSS, and JavaScript. Website includes a creative image map, a grid-displayed interactive image gallery, a contact form, unified design style, and a fully functional navbar. Accomplished three interesting sub-projects for practice while creating the portfolio website.
- Project Responsibilities:** Analyzed the structure of the website, wrote an implementation method document, arranged learning and practicing content for every part of the portfolio building, and reviewed and restructured the finished code.
- Tools:** HTML, CSS, JavaScript.

Dojo Blog Website | independent director

2023.01

- Project Outcome:** Created a simple blog website with uploading and deleting blogs functions by using React. Utilized hooks such as useEffect and useState to fetch data and handle errors.
- Tools:** React, JavaScript, HTML, CSS.

Catan Dice Game | Team leader

2022.09-2022.10

- Project Outcome:** Successfully developed a well-functioning game adhering to the corresponding game rules. Designed a user-friendly and aesthetically pleasing front page using JavaFx.
- Project Responsibilities:** Analyzed and decomposed project tasks, designed front-end pages, and worked on back-end functions and their implementation methods. Set up multiple functions for the team to use, collaborated closely with the team via GitHub, and supervised the whole process of the project.
- Tools:** Java, JavaFx, GitHub.
